Vendor Assessment Preparation Guide

Font note: This offline PDF uses Noto Serif and Noto Sans fallbacks. Configure licensed Minion and Myriad report fonts for CU typography.

Draft preparation package

Confirmed Vendor name · Campus Parcel Desk · 1.0

Original preparation content. Not an official HECVAT, VPAT-based ACR, OpenACR document, certification, or endorsement.

This package records the stated product scope, responses, supporting sources, tests, and human review. Documentation completeness is not a security or accessibility rating.

Snapshot: a0984f80-81bd-4261-b88b-afe1d8fe52b3 · 2026-11-04T17:48:05.672Z · revision 3

Report reviewer: Draft — no final acknowledgment

SYNTHETIC DEMONSTRATION — no real vendor or customer records

Your next steps

1 of 8 preparation responses reviewed; 13 preparation tasks remain.

Unofficial preparation guide. Reviewed material is reusable source text, not a completed HECVAT workbook or VPAT-based Accessibility Conformance Report. Original preparation identifiers must not be treated as official mappings.

Work through 7 unresolved preparation questions: Start with what you know. Record Unknown when a fact is missing and ask the responsible product, support, or institution contact. Add a source or an explicit firsthand attestation.

Finish the accessibility scope and evaluation: Confirm the purchaser’s full criterion inventory, record representative tests and limitations, and make separate human criterion judgments. Document failures honestly; successful starter tests alone do not establish conformance.

Finish and submit the requested documents

1 Confirm the purchaser’s requested deliverables: Ask for the exact questionnaire version and accessibility report edition, standards, level, product scope, due date, and submission contact. Record their answers in Product setup.

2 Open the requested documents: Obtain the requested HECVAT workbook from EDUCAUSE and the appropriate VPAT® edition from ITI, or use the purchaser’s supplied files. Keep an unchanged original and work in a copy.

3 Transfer reviewed material and finish the remaining coverage: Use the reviewed response blocks below as source material. Read each actual question or criterion before transferring text. Our preparation identifiers are not official question identifiers and we do not map them automatically. Follow the actual workbook’s scoping instructions and cover every required criterion; the starter areas are only a starting point.

4 Keep limitations and unresolved items visible: Carry over negative answers, failed tests, scope limits, and supporting references accurately. Obtain missing facts and finish required testing. Do not turn unknowns into positive answers or non-applicability.

5 Have a human check the completed documents: Check product/version, dates, contact, methods, standards, explanations, source currency, and purchaser requirements. Preserve workbook formulas and evaluation functionality and the report template's required wording and structure.

6 Send the requested files and retain your record: Review evidence for sensitive information and share only appropriate supporting files through the purchaser's agreed channel. Send the functioning HECVAT workbook when requested and the requested accessibility report. Retain the issued files, this preparation snapshot, and a backup. A completed preparation package still needs this handoff.

Reviewed response blocks for transfer

Read the actual question before reusing any block. Verify its fit and keep its limitations and evidence references. Unapproved and stale responses remain in the assessment section, not in these transfer blocks.

DEMO-DATA-01: Is information transmitted outside the installation?

Preparation topic: Is information transmitted outside the installation?

Product: Campus Parcel Desk 1.0

Applicability: Applicable

Response: No

Explanation: This control is not implemented in the synthetic product.

Human attestation: Demo author confirms firsthand observation in the synthetic fixture.

Author: Demo author

Reviewed by: Morgan reviewer on 2026-11-04T17:48:05.671Z

Reviewer notes: Negative response checked against synthetic fixture.

Reviewed accessibility blocks for transfer

No reviewed criterion judgments are ready for transfer. Record evaluations and human judgments; keep unresolved criteria visible in the draft.

Product and assessment details

Vendor name: Confirmed Vendor name [confirmed]

Product name: Campus Parcel Desk [confirmed]

Product version: 1.0 [confirmed]

Assessment date: 2026-11-04 [confirmed]

Product description: Confirmed Product description [confirmed]

Deployment model: Confirmed Deployment model [confirmed]

Supported operating systems: Confirmed Supported operating systems [confirmed]

Users: Confirmed Users [confirmed]

Main workflows: Confirmed Main workflows [confirmed]

Data collected: Confirmed Data collected [confirmed]

Data stored: Confirmed Data stored [confirmed]

Data transmitted: Confirmed Data transmitted [confirmed]

Data deletion and retention: Confirmed Data deletion and retention [confirmed]

Storage locations: Confirmed Storage locations [confirmed]

Backups: Confirmed Backups [confirmed]

External connections: Confirmed External connections [confirmed]

Campus and other integrations: Confirmed Campus and other integrations [confirmed]

Remote support and diagnostic access: Confirmed Remote support and diagnostic access [confirmed]

Payment involvement: Confirmed Payment involvement [confirmed]

Vendor and institution responsibilities: Confirmed Vendor and institution responsibilities [confirmed]

Assessment owner: Confirmed Assessment owner [confirmed]

Report contact: Confirmed Report contact [confirmed]

Requested questionnaire and version: Confirmed Requested questionnaire and version [confirmed]

Requested accessibility standard: Explicit synthetic test scope [confirmed]

Requested level: Custom [confirmed]

Requested report edition: Generic preparation report [confirmed]

Evaluation scope and exclusions: Confirmed Evaluation scope and exclusions [confirmed]

Evaluation methods: Confirmed Evaluation methods [confirmed]

External transmissions: No

Accessibility judgments and test findings

Starter areas are not a complete standards inventory. Judgments apply only to the explicitly recorded scope. Test outcomes and human criterion judgments are separate.

STARTER-KEYBOARD Keyboard and focus: Explicit synthetic test scope; Custom; scope: Synthetic workflow

Human judgment: Unresolved required criterion — no judgment recorded

STARTER-NAMES Labels and accessible names: Explicit synthetic test scope; Custom; scope: Synthetic workflow

Human judgment: Unresolved required criterion — no judgment recorded

STARTER-READER Screen-reader interaction: Explicit synthetic test scope; Custom; scope: Synthetic workflow

Human judgment: Unresolved required criterion — no judgment recorded

STARTER-ERRORS Error identification and correction: Explicit synthetic test scope; Custom; scope: Synthetic workflow

Human judgment: Unresolved required criterion — no judgment recorded

STARTER-VISUAL Contrast and enlargement: Explicit synthetic test scope; Custom; scope: Synthetic workflow

Human judgment: Unresolved required criterion — no judgment recorded

STARTER-TASKS Complete important tasks: Explicit synthetic test scope; Custom; scope: Synthetic workflow

Human judgment: Unresolved required criterion — no judgment recorded

Test 1096e1ab-d873-4265-8de5-24626b5a0d80

Criterion: STARTER-KEYBOARD

Screens and controls: Shipment form

Workflow: Create a shipment

Tested product version: 1.0

Operating system: Windows 11

Configuration: Synthetic demo

Test method: Manual keyboard test

Tools and assistive technologies: Keyboard; synthetic fixture

Expected behavior: All controls reachable

Observed behavior: Print button cannot be reached

Tester: Demo tester

Test date: 2026-11-04

Test result: Fail

Findings: Print label button is skipped by keyboard focus.

Testing limitations: Synthetic example, not a real product evaluation

Remediation notes: Add print control to tab order.

Test identifier: 1096e1ab-d873-4265-8de5-24626b5a0d80
